Bausch & Lomb Magnifying Devices

Bausch & Lomb is the leading manufacturer and distributor of magnifying devices in the United States. Only the finest quality material is used in their distortion-free lenses and frames. Special lightweight plastic material is used throughout B&L's manufacturing and all products are scratch resistant.

Power Magnification
The curved surface of a magnifying lens bends the light rays to produce an image that appears larger than the object itself. The degree of magnification is determined by the curvature of the lens surface.

Field of View
The Higher the Power the Smaller the Field of View.

Focal Length (Working Distance)
The Higher the Power, the Shorter the Working Distance.

Round and Rectangular Readers

These magnifiers are designed to cover areas with a large field of view. They are excellent for reading or a quick overview of stamps or coins. Contoured handles for easy and comfortable handling.
